

INSTRUCTION MANUAL

Model 24145 Unicheck Digital Pressure

Specifications:

1. Calibration Units: Bar, Kg/cm², kPa, and PSI
2. Measure Range: 2-150 PSI
3. Resolution: 0.1 PSI
4. Operating Temperature: 0°C ~ 50°C
5. Power Source: Lithium and Alkaline LR44

Instructions:

1. Place the gauge's nozzle onto a tire valve firmly.
2. Press the button to turn on the power and back light.
3. Wait for 2 seconds or a buzzer sound and remove gauge nozzle from a tire valve to see an accurate tire pressure from the display.
4. On Button can be pushed for unit changing.
5. Unit can be changed either before or after checking a tire pressure and will be automatically converted to a correct pressure on the display.
6. Backlight automatically turns off after a measurement.
7. For every power on cycle, gauge can be lasted 20 seconds around and then off.
8. Gauge can be manually powered on by once pushing button or turn off by holding the button for 3 seconds.
9. Remove the battery lid for changing batteries.
10. Low battery icon alarm when voltage is under 2.5V.
