Experts in Tire Handling Equipment

Easy Gripper

The Easy Gripper product range is designed to help tire professionals in a multitude of conditions and situations. Implementing The Easy Gripper makes tire handling faster and safer, while preventing damage to tires, rims and equipment.

Capability

With a gripping range of Ø850 - 2.400 mm (34 - 94 inches) and a lifting capacity of 2 ton (4.400 lbs) at a CoG of 550 mm (22 inches), this Gripper can handle tires up to 37.25R35. When handling full wheel assemblies as inside duals, the Gripper handles up to 24.00R35 tires.

Underground mines

Solves issues with limited clearance around the tires. The 2 bottom pipes grip the tire below the fender, and the top pipe can easily be changed to a flat arm to fit between tire and fender.

Quarries

Reduces down time and improves the safety for the tire technicians. See also the tools for handling the rings, when mounting or demounting tires.

Ports

This Gripper is big enough to handle tires and wheels on Straddle Carriers, Reach Stackers and RTG cranes. With safety as a big issue.

Breakdown service

Used on front loaders, telehandlers or truck cranes you get a perfect solution to provide tire service in the field. You can do the job without any equipment or assistance from your customer, do it faster and make a hard and risky work safe for your operators.

Electrical stackers and reach trucks

For use with the Gripper when working space is limited. See Easy Gripper Workshop 2400-2T.

Front loaders and telehandlers

The Compact version without the tilt box is a good choice if the carrier can provide sufficient tilt.

Truck cranes

By use of our crane module, the Gripper can also fit with almost any truck crane system.

Standard Features

Unique and safe 3-point grip

Avoid accidents.

Avoid deformation and damages of tires.

Avoid damages to tires, rims and equipment.

Integrated camera system for optimal view

With automatic IR function in insufficient light conditions.

Precise rotation +/-25°

Horizontal/vertical tilt depending on carrier

Required accessory

Compact Mounting Plate

Can be customized pre-angled depending on carrier.

Optional accessories

Easy shift of gripping pipes for various purposes

Flat top arm for limited tire clearance.

Telescopic pipes for long reach, to provide room for the tire fitters and for dual tire handling.

Tools for safe handling of tire rings

To help tire fitters with the hard and dangerous work.

Can easily be attached at the end of the gripping pipes.

Can push the tire and can hold and place the rings.

LED working light

Second camera for view of bolt diameter

Customization on request
